Binary / Koblitz summation systems: exact LFD vs k (marker area = count)
written min(k,l)+2 = k+2 (m=2 only)
kernel k+l+1 = 2k+1 (m=2)
kernel r+1 = 3k+1 (m=3 direct)
m=2 sweep k<=7 (ic-curve-sweep)
m=2, this item (k=8..10)
m=3 direct, this item
m=3 split, this item
exact LFD (certified)
coordinate-space dimension k
